surfaces and features. Due to the cumulative effects of these additions, Building 111 no longer possesses the integrity of materials, design, and feeling.

Inventory Number: __CH-371

Building 111 was constructed in 1899 at the Naval Powder Factory (1900-1945). The Naval Powder Factory is an industrial facility significant as the first major chemical factory operated by the Navy and an important supplier of smokeless powder during World Wars I and II. Building 111 was constructed as in infrastructure support building for the facility and was not individually important for its association with the Powder Factory base line. Archival research did not indicate that the building is associated with important persons at Indian Head. Building 111 is a highly modified structure and no longer possesses distinctive characteristics of a type, period, or method of construction. The building does not represent the work of a master or possess high artistic value. Building 111 is not likely to yield information important in prehistory or history. Building 111 is not located in an area that contains a concentration of historic buildings with integrity sufficient to be delineated as an historic district.
